

Fabio Concina

Head of AI & Analytics

in [fabioconcina](#)
🌐 [fabioconcina.com](#)

Profile

Engineering leader with over a decade in software and data, focused on taking AI from prototype to production in demanding industrial settings. Currently leading the AI & Analytics team at kwantis, a ~40-person SaaS company whose product, ID3, runs in production for major energy operators including Eni, Saipem, TotalEnergies, and Weatherford.

Experience

2025 – **Head of AI & Analytics**, *kwantis*, Milan

- Present
- Lead the 8-person AI & Analytics team, owning ID3's AI capabilities end to end, from research to production.
 - Shipped LLM and agentic features into ID3, including generative AI for automated daily drilling report (DDR) data capture that saves crews ~40 minutes per shift, deployed in production across 4 rigs and 150+ rig-days at 100% IADC compliance.

2020 – 2025 **Manager, AI & Analytics**, *kwantis*, Milan

- Helped grow kwantis's engineering organization from 5 to 20 people and built the analytics group that became today's AI & Analytics team.
- Owned the design of ID3's analytics layer, which grew into ID3 Benchmark, the suite's flagship module.
- Designed the AI anomaly-detection pipeline for surface-logging data quality, later presented at SPE Europe 2025.

2015 – 2020 **Software Engineer**, *kwantis*, Milan

- Designed and built the first version of ID3, shaping its architecture and early direction.
- Deployed on-site at clients including Eni, Repsol, and Enel Green Power to integrate ID3 into their operations.

Publications

- 2025 Alireza Nadirkhanlou, **Fabio Concina**. *Detecting Low-Quality Intervals in Surface Logging Data Using AI-Based Anomaly Detection*. SPE Europe Energy Conference and Exhibition, Vienna, Austria. [Link](#).
- 2023 Vanessa Silvia Iorio, Daniele Farina, Stefano Racca, Luca Dal Forno, **Fabio Concina**. *Advanced Analytic Tool Development for GHG Emissions Monitoring in Well Operations*. Offshore Technology Conference, Houston, Texas, USA. [Link](#).

Talks & Posters

- 2026 Deep Shah, Arafat Osman, **Fabio Concina**. *Automating Daily Drilling Reports Using Generative AI: Reducing Reporting Time from Hours to Minutes*. Poster, IADC World Drilling Conference & Exhibition, Estoril, Portugal. [Link](#).
- 2026 *Transforming Operational Reporting: How Generative AI Automates DDR Data Capture*. IADC DEC Tech Forum, Houston, Texas, USA. [Link](#).

2024 *AI to Improve Data Quality for Automating Drilling Reports*. SPE DSEA AI 4 Energy Workshop, Aberdeen, UK. [Link](#).

Press

2026 *Generative and Agentic AI Solutions Unlock New Insights for Drilling*. Interview, Drilling Contractor. [Link](#).

Education

2015 **MSc in Statistics and Actuarial Science**, *University of Trieste*, Trieste
Contributed to the R ChainLadder package as part of thesis research on stochastic reserving methods (thesis, [PDF](#)).

2012 **BSc in Mathematical Engineering**, *Politecnico di Milano*, Milan
Final presentation on biological waves applied to epidemic spread and control ([PDF](#)).

Technical Skills

Leadership Team leadership, hiring and onboarding, performance management, roadmap execution, cross-functional collaboration.

AI/ML LLMs and agentic AI (OpenAI, Anthropic; LangChain, LangGraph), MLflow, Qdrant.

Core stack Python, Polars, DuckDB, PostgreSQL, Kubernetes, AWS.

Languages

Italian Native.

English **C1** Level.
