

Fabio Concina

HEAD OF AI & ANALYTICS

fabioconcina.com | github.com/fabioconcina | linkedin.com/in/fabioconcina

PROFILE

Engineering leader with over a decade in software and data, focused on taking AI from prototype to production in demanding industrial settings. Currently leading the AI & Analytics team at [kwantis](#), a ~40-person SaaS company whose product, [ID3](#), runs in production for major energy operators including Eni, Saipem, TotalEnergies, and Weatherford.

EXPERIENCE

Head of AI & Analytics

2025 – Present

[kwantis](#) | Milan, Italy

- Lead the 8-person AI & Analytics team, owning ID3's AI capabilities end to end, from research to production.
- Shipped LLM and agentic features into ID3, including generative AI for automated daily drilling report (DDR) data capture that saves crews ~40 minutes per shift, deployed in production across 4 rigs and 150+ rig-days at 100% IADC compliance.

Manager, AI & Analytics

2020 – 2025

[kwantis](#) | Milan, Italy

- Helped grow kwantis's engineering organization from 5 to 20 people and built the analytics group that became today's AI & Analytics team.
- Owned the design of ID3's analytics layer, which grew into [ID3 Benchmark](#), the suite's flagship module.
- Designed the AI anomaly-detection pipeline for surface-logging data quality, later presented at SPE Europe 2025.

Software Engineer

2015 – 2020

[kwantis](#) | Milan, Italy

- Designed and built the first version of ID3, shaping its architecture and early direction.
- Deployed on-site at clients including Eni, Repsol, and Enel Green Power to integrate ID3 into their operations.

PUBLICATIONS

Detecting Low-Quality Intervals in Surface Logging Data Using AI-Based Anomaly Detection

2025

Alireza Nadirkhanlou, **Fabio Concina** | SPE Europe Energy Conference and Exhibition, Vienna, Austria

Advanced Analytic Tool Development for GHG Emissions Monitoring in Well Operations

2023

Vanessa Silvia Iorio, Daniele Farina, Stefano Racca, Luca Dal Forno, **Fabio Concina** | Offshore Technology Conference, Houston, Texas, USA

TALKS & POSTERS

Automating Daily Drilling Reports Using Generative AI: Reducing Reporting Time from Hours to Minutes

2026

Deep Shah, Arafat Osman, **Fabio Concina** | Poster, IADC World Drilling Conference & Exhibition, Estoril, Portugal

- Transforming Operational Reporting: How Generative AI Automates DDR Data Capture

IADC DEC Tech Forum, Houston, Texas, USA

2026
- AI to Improve Data Quality for Automating Drilling Reports

SPE DSEA AI 4 Energy Workshop, Aberdeen, UK

2024

PRESS

- Generative and Agentic AI Solutions Unlock New Insights for Drilling

Interview, Drilling Contractor

2026

EDUCATION

- MSc in Statistics and Actuarial Science

University of Trieste | Trieste

Contributed to the [R ChainLadder package](#) as part of thesis research on stochastic reserving methods ([thesis](#), [PDF](#)).

2015
- BSc in Mathematical Engineering

Politecnico di Milano | Milan

Final presentation on biological waves applied to epidemic spread and control ([PDF](#)).

2012

PROJECTS

- claumon

Open-source dashboard for Claude Code, written in Go: a single binary, zero config, showing rate-limit gauges, per-session token and cost breakdowns, and historical trends. The gauges are driven by a small Bayesian forecaster that predicts usage at window reset and time-to-limit, each with an 80% credible interval.

2026

TECHNICAL SKILLS

- LEADERSHIP

Team leadership, hiring and onboarding, performance management, roadmap execution, cross-functional collaboration.
- AI/ML

LLMs and agentic AI (OpenAI, Anthropic; LangChain, LangGraph), MLflow, Qdrant.
- CORE STACK

Python, Polars, DuckDB, PostgreSQL, Kubernetes, AWS.

LANGUAGES

- ITALIAN

Native.
- ENGLISH

C1 Level.

AFFILIATIONS

- Society of Petroleum Engineers (SPE), Professional Member since 2024, Italian Section.
