Fabio **Concina**

HEAD OF AI & ANALYTICS

Milan, Italy | fabioconcina.com | github.com/fabioconcina | linkedin.com/in/fabioconcina

PROFILE

Engineering leader with over a decade in software and data, focused on taking AI from prototype to production in demanding industrial settings. Currently leading the AI & Analytics team at kwantis, a ~40-person SaaS company whose product, ID3, runs in production for major energy operators including Eni, Saipem, Shelf Drilling, and Weatherford.

EXPERIENCE

Head of AI & Analytics

2025 – Present

kwantis | Milan, Italy

- Lead the 8-person AI & Analytics team, owning ID3's AI capabilities end to end, from research to production.
- Shipped generative AI for automated daily drilling report (DDR) data capture in ID3, saving crews ~40 minutes per shift in production across 4 rigs and 150+ rig-days at 100% IADC compliance.
- Designed a label-free statistical early-warning system for drilling dysfunction (stuck pipe, washouts, lost circulation), validated through pre-registered studies on 100+ wells.
- Direct the next wave of ID3 features, including the ID3 AI Assistant and an agentic data QC system.

Manager, AI & Analytics

2020 – 2025

kwantis | Milan, Italy

- Helped grow kwantis's engineering organization from 5 to 20 people and built the analytics group that became today's AI & Analytics team.
- Owned the design of ID3's analytics layer, which grew into ID3 Benchmark, the suite's flagship module.
- Designed the AI anomaly-detection pipeline for surface-logging data quality, later presented at SPE Europe 2025.

Software Engineer / Data Scientist

2015 – 2020

kwantis | Milan, Italy

- First technical hire; designed and built the first version of ID3, shaping its architecture, data model, and early analytics.
- Deployed on-site at clients including Eni, Repsol, and Enel Green Power to integrate ID3 into their operations.

PUBLICATIONS

Detecting Low-Quality Intervals in Surface Logging Data Using AI-Based Anomaly Detection

2025

Alireza Nadirkhanlou, **Fabio Concina** | SPE Europe Energy Conference and Exhibition, Vienna, Austria

Advanced Analytic Tool Development for GHG Emissions Monitoring in Well Operations

2023

Vanessa Silvia Iorio, Daniele Farina, Stefano Racca, Luca Dal Forno, **Fabio Concina** | Offshore Technology Conference, Houston, Texas, USA

TALKS & POSTERS

2026

Automating Daily Drilling Reports Using Generative AI: Reducing Reporting Time from Hours to Minutes

Deep Shah, Arafat Osman, **Fabio Concina** | Poster, IADC World Drilling Conference & Exhibition, Estoril, Portugal

2026

Transforming Operational Reporting: How Generative AI Automates DDR Data Capture

IADC DEC Tech Forum, Houston, Texas, USA

2024

AI to Improve Data Quality for Automating Drilling Reports

SPE DSEA AI 4 Energy Workshop, Aberdeen, UK

PRESS

2026

Generative and Agentic AI Solutions Unlock New Insights for Drilling

Interview, Drilling Contractor

EDUCATION

MSc in Statistics and Actuarial Science

2015

University of Trieste | Trieste

Contributed to the R ChainLadder package as part of thesis research on stochastic reserving methods (thesis, PDF).

BSc in Mathematical Engineering

2012

Politecnico di Milano | Milan

Final presentation on biological waves applied to epidemic spread and control (PDF).

PROJECTS

2026

claumon

Open-source dashboard for Claude Code, written in Go: a single binary, zero config, showing rate-limit gauges, per-session token and cost breakdowns, and historical trends. The gauges are driven by a small Bayesian forecaster that predicts usage at window reset and time-to-limit, each with an 80% credible interval.

SKILLS

LEADERSHIP	Team leadership, hiring and onboarding, performance management, roadmap execution, cross-functional collaboration.
AI/ML	LLMs and agentic AI (OpenAI, Anthropic; LangChain, LangGraph), MLflow, Qdrant.
CORE STACK	Python, Polars, DuckDB, PostgreSQL, Kubernetes, AWS.

LANGUAGES

ITALIAN	Native.
ENGLISH	**C1** (full professional proficiency).

AFFILIATIONS

Society of Petroleum Engineers (SPE), Professional Member since 2024, Italian Section.
